# Sending E-Mail From Inside Your iOS Application

Presented By: David Rodriguez
Mobile Dev NJ Meetup

programmerdave.tumblr.com

iPhone App

- Send E-mail inside your application

- Pre-Fill E-mail Body, Subject, and Recipient

- Uses MessageUI Framework

Steps

- Setup a UIButton to click

- Setup MFMailComposeViewController

- Pre-Fill E-mail Content

- Present View Controller when button is clicked

- Use Delegate Callback to Check for Cancellation, Success, or Failure

Realtime Demo
